

# Your technical partner

for end-to-end custom software solutions

[assist-software.net](http://assist-software.net)

# **ASSIST Software is a nearshore and offshore technical partner**

capable of delivering quality custom software development services that are backed by highly creative teams.

## HOW IT ALL STARTED

ASSIST Software was founded in 1992 by **two ambitious Romanian engineers** with backgrounds in **nuclear physics**, who shared a passion for driving **innovation** in our community.

# INNOVATION

is in our DNA

**OUR MISSION**

**To nurture creativity in every individual and inspire people to make an impact in the world.**

#### WHAT MAKES US UNIQUE

- Proud to be local
- A company of engineers
- Restless early adopters

ASSIST IN NUMBERS

CLIENTS

452

PROJECTS

Suceava, Romania, Europe

## OUR STRENGTHS

- 9 years of Agile Software Development
- Certified ISO 9001, 14001, 27001 with regular audits up to date
- Most Innovative SME in Romania in 2017 Award
- Experience in working with global companies

- Medical and military standards of security and quality
- Certified developers, SCRUM masters and QA engineers
- 140 European partners in 17 EU-funded projects under H2020, FP7 & EUROSTARS
- Microsoft Gold, AWS, MongoDB partners

## COLLABORATION MODELS

### Project-based

- Clear requirements
- Dynamic team scaling
- Self-managed
- Cost per project

### Dedicated Team

- Fixed Team
- Product Owner
- Self-managed
- Milestone-based cost

### Team Augmentation

- Mixed teams
- Shared tools
- Joint ceremonies
- Time/Material

## TEAMS PROFILE

We have the ability to provide customized teams of professionals with flexible allocation to augment your teams using the time/material model.

Some of the key characteristics of our staff that we believe differentiate us:

- Easy to work with, low maintenance
- Understand the big picture
- Organize frequent demos
- Always available
- Assume ownership and responsibility over projects
- Transparent and efficient in communication
- Maintain team motivation

We also offer the possibility of working following the fixed-price model by setting up and managing teams on our own. We have the capability of taking an idea and turning it into a working product from vision to market, including the product design phase.

The image shows a smartphone displaying a mobile application interface. The app features a blue header with a logo, a main content area with a photo of a sports event, and a bottom navigation bar with icons for 'Blog', 'Members', 'Events', and 'Login'. The text on the screen reads 'BOI Dr McKenna Cup Rd 2 Donegal v Cavan' and 'July 15, 2019 MacCumhail Park'. Three development framework icons are overlaid on the phone: Flutter (a blue and green stylized 'F'), Kotlin (a blue and orange 'K'), and React Native (a blue atom symbol).

# Mobile capabilities

## Native Applications

We build beautiful applications for both iOS and Android using Kotlin, Java, Swift and Objective C. We believe apps should be fast, aesthetically pleasing, easy to use and secure.

## Hybrid Applications

We build hybrid apps using React Native, Ionic and Flutter. We focus on time-to-market and cross-platform compatibility.

## Publishing

We use deployment tools such as Testfairy for regular staging demos and Fastlane for automated production publishing to stores. We monitor application health using Firebase Crashlytics.

# Frontend capabilities

## Mobile first

We love making beautiful responsive designs. We focus on usability, we measure click depth, we create custom UIs based on localization, we avoid redundant user actions, etc.

## Performance / Quality

We measure app performance. We use lazy-loading, compressed assets, CDNs, etc. We make sure to use local storage for offline use. We encrypt copyrighted or sensitive content. We avoid page refreshes. We use GraphQL in projects.

## Compliance

We make sure apps are compatible with multiple browsers, OSs and a variety of devices. We implement advanced accesibility features. We ensure that we comply with GDPR, COPPA, HIPAA and other standards.

# Backend capabilities

## REST Frameworks

We have a preference for REST protocols. We build flexible architectures and we use Swagger for auto-generated documentation.

## Scalability

We employ best practices when it comes to scalability. We optimize resource consumption and we have good experience in working with large databases and datasets. We perform stress tests and we scan for bottlenecks.

## Microservices

We have experience in architecting, building and managing complex applications with up to 45 microservices. We love using Lambda functions whenever it makes sense.

### **AWS, Azure, Google Cloud**

We have extensive experience in using the AWS and Azure ecosystems including IoT platforms. We have designed and built multiple applications using these infrastructures and a large variety of services.

### **Dynamic/Static Code Analysis**

We use the latest automatic tools (such as SonarQube, Whitesource and BurpSuite) to continuously validate the implementation of security best practices in code.

### **Docker**

We love using Docker containers, often paired up with ECS Clusters. We like using Atlassian Bamboo to manage our pipelines.

## SCRUM METHODOLOGY

Many companies opt for methodologies that serve as allies in creating programs, applications or digital tools that enrich their work. We do this too.

Sprints • Backlog

Demos • Retrospectives

## Agile SAFe

Our teams are accustomed to implementing agile SCRUM processes that really work following the 4 main principles in the Agile Manifesto.

We also have experience in working with the SAFe framework and coordinating with multiple SCRUM teams around the delivery trains.

We understand the importance of being flexible and adapting to our clients' needs, therefore we customize the collaboration model for each client.

We use the Git features to their full potential. We work with feature branches and we create merge/pull requests. We perform code review for every merge request and test on our development/staging environments.

## Self-managed teams

## Transparency and predictability

By collaborating with your product manager we can set up our own roadmap. We are capable of managing our own epics and sprints.

We can hold internal SCRUM ceremonies, or joint ones with other development teams.

ASSIST Scrum Masters and Product Owners will participate in the periodical SCRUM of SCRUMs.

ASSIST teams coordinate with you periodically to perform backlog grooming.

We have regular demos at the end of every sprint and a staging environment always available online for testing.

## Quality and performance

**We are strict in following development rules and conventions. Our developers are experienced in writing safe code and implementing secure solutions compatible with HIPAA, ISO 27001, GDPR and other standards.**

The ASSIST Software team has extensive experience with the full stack of web services from AWS and Azure across numerous projects, having multiple certified cloud solution architects (AWS and Azure).

Our developers use Git features to their full potential. They work with feature branches and create merge/pull requests. They perform code review for every merge request and test on our development/staging environments.

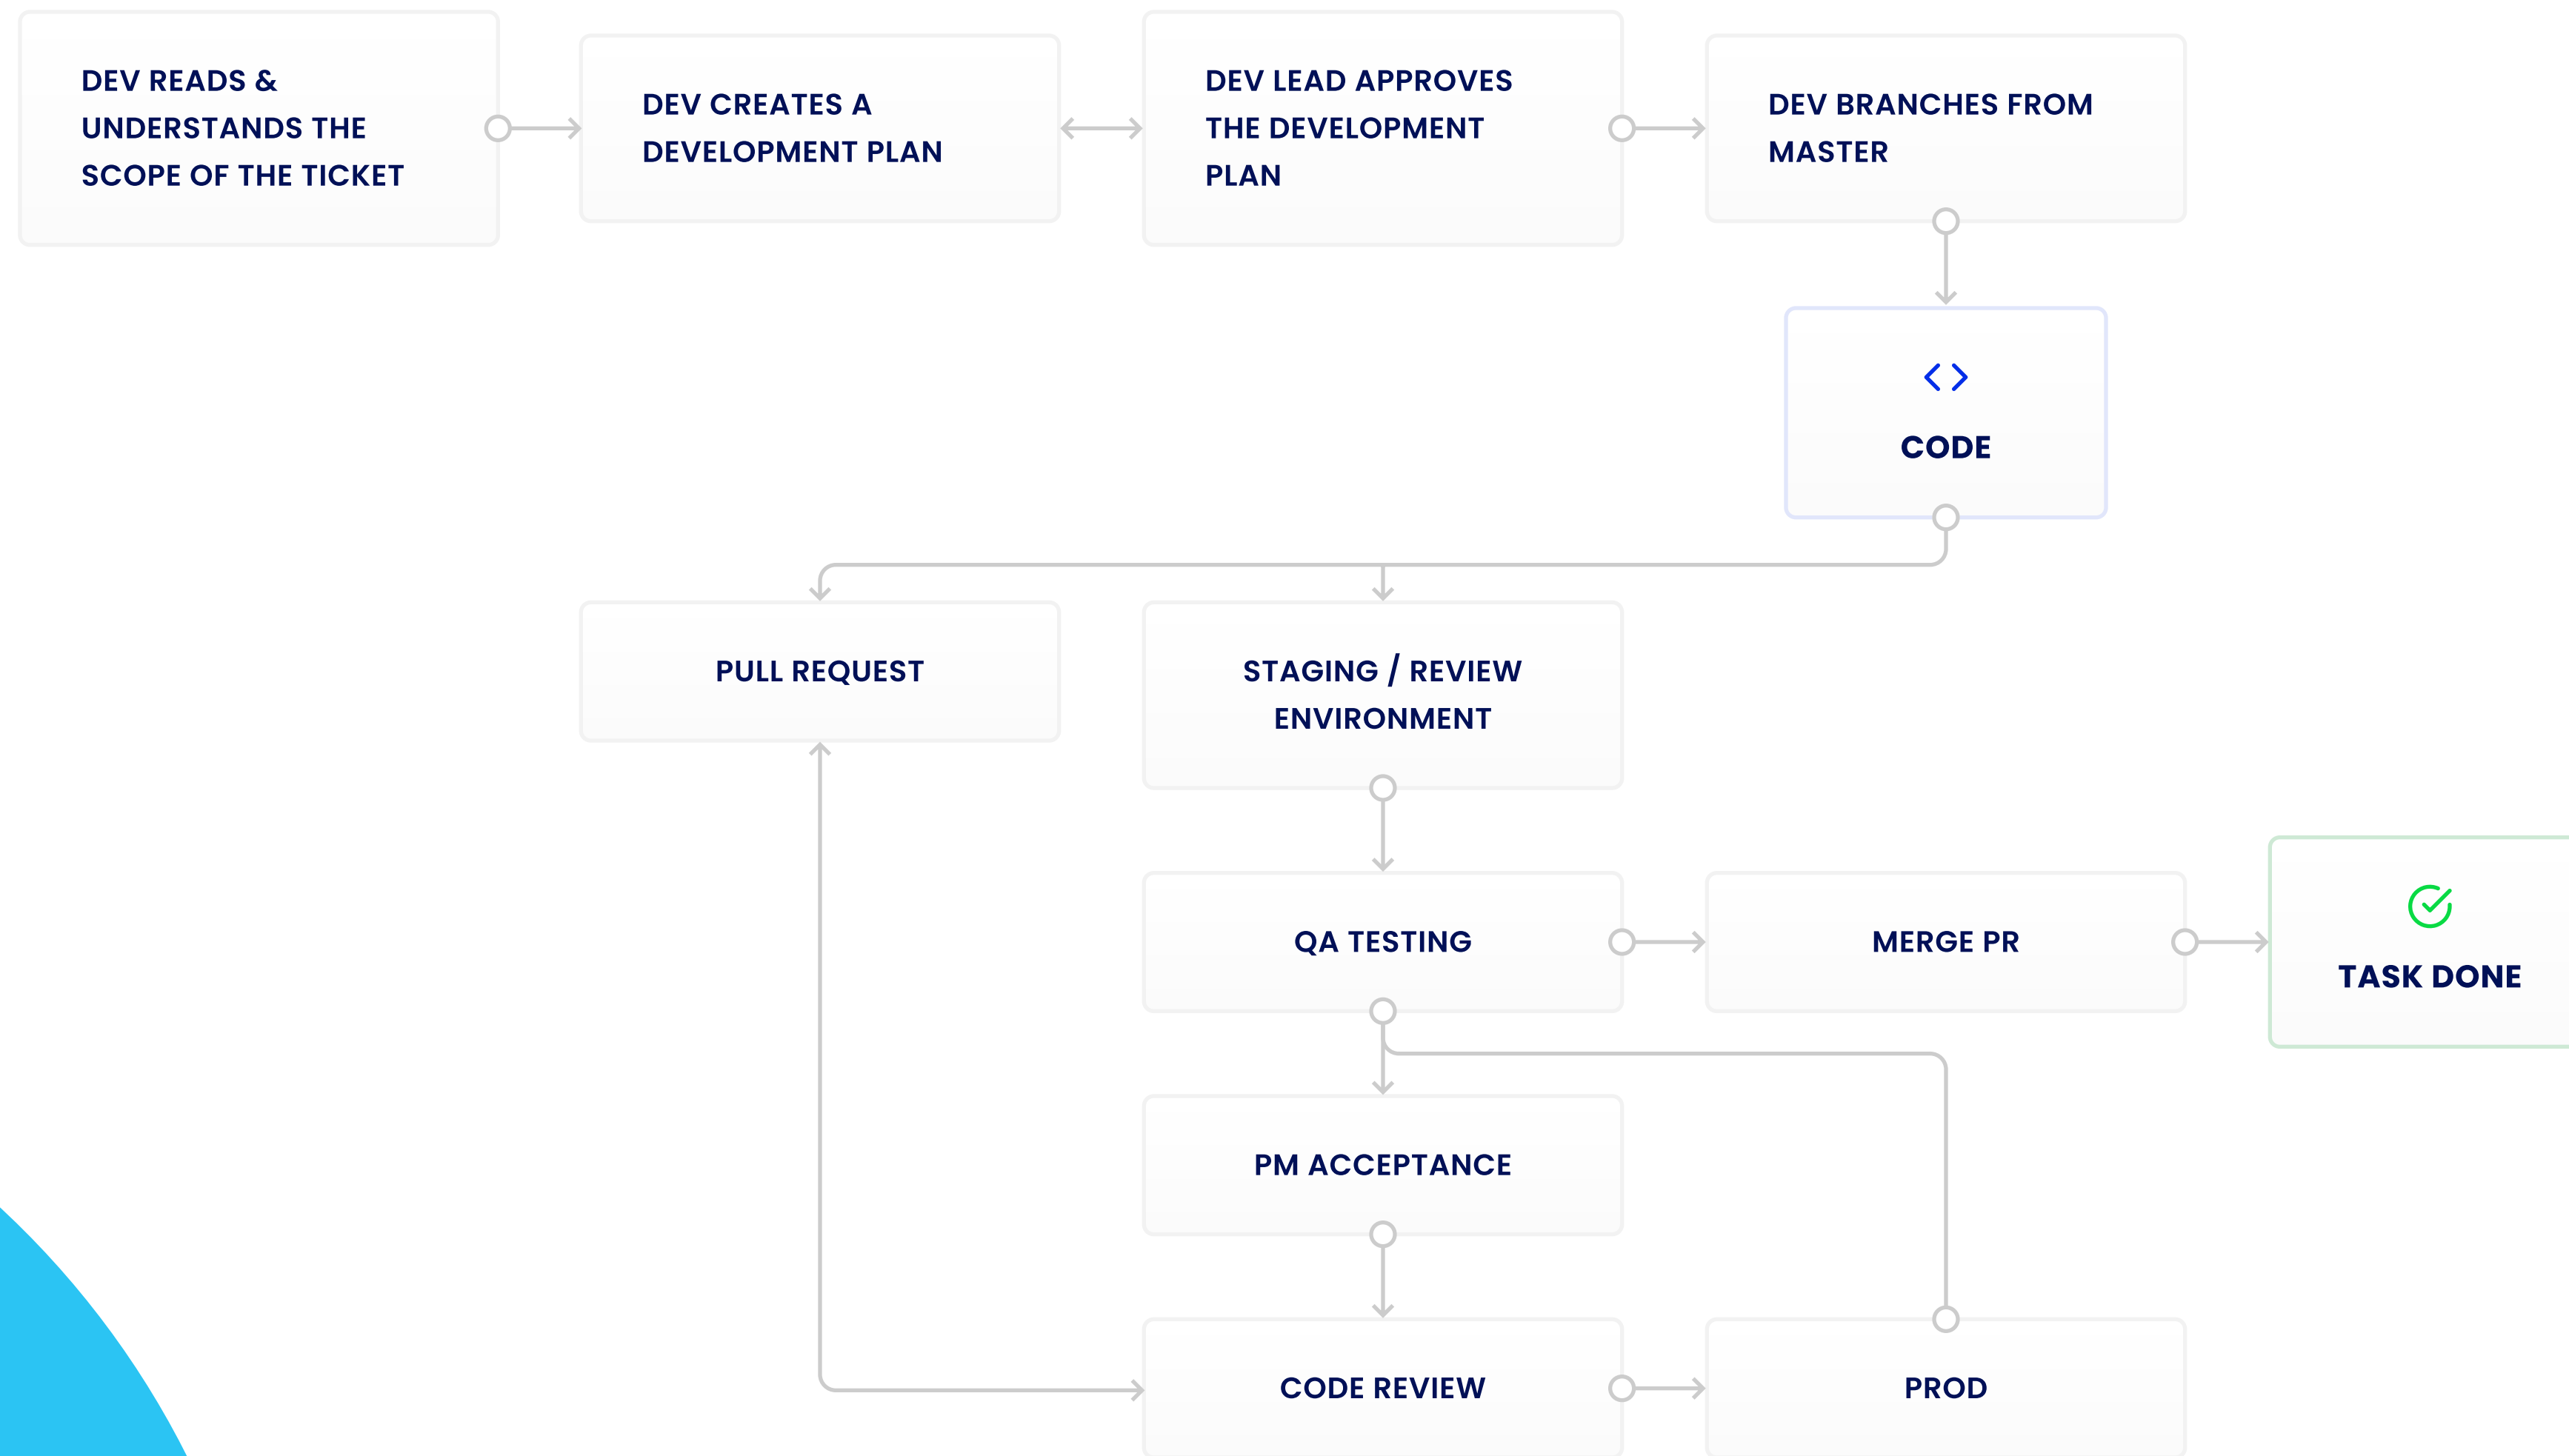

The development team at ASSIST Software has experience in working with a variety of CI tools. They have set up complex CI environments and deployment pipelines from scratch in different projects and different cloud platforms.

We are capable of architecting, deploying and managing complex cloud platforms using microservices.

Our QA team is proficient in performing a variety of tests such as load testing, stress testing, integration testing etc.

## WHY ASSIST?

### Innovation

Innovation is our core value. We are eager to work with partners who share this mission.

We consider this collaboration to be a great opportunity to prove our innovation capabilities and bring new ideas to your company.

We believe we can offer you a very rich range of opportunities mainly driven by the diversity of skills we can provide. We are drawn to partnering with innovative companies and we appreciate working with clients that have experience in development and a day-to-day work style similar to ours.

### Cultural Fit

Based on our experience in working with European and American companies, our cultural and professional habits fit well together.

### Always Reliable

28 years of experience in the software industry. Multiple successful partnerships alongside team members, many of which lasted 5+ years. 94% employee retention rate in 2018.

### Ownership

We take ownership over projects, sharing responsibility towards a successful delivery. We are proactive and solution oriented.

**We always deliver in time!**

## TESTIMONIALS

*I was highly impressed by their work. Not only did they really comprehend our ideas, but they also helped us to sharpen our vision of our platform by addressing the right questions.*

*And while being excellent with regards to contents, they also delivered on time, according to the agreements and were overall very reliable. It was a pleasure working with them.*

**Dr. Katja Weichsel**

PROJECT MANAGER AT PAEDIPILOT

## TESTIMONIALS

*The ASSIST SOFTWARE SRL team has always been dependable, straightforward and enthusiastic. They displayed excellent expertise in the software development area. I was introduced to some of their projects and admired the creative and innovative solutions they developed.*

*I am happy to recommend ASSIST to anyone seeking reliable partners in international projects.*

**Johan Plomp**

SENIOR RESEARCHER AND TEAM LEADER AT VTT

## TESTIMONIALS

*With great pleasure and deep confidence I may provide a strong recommendation for ASSIST Software SRL and their professional team for software development projects.*

*As a senior consultant and software development project manager at IBM for many years I was asked (among other topics) for consultancy and recommendations in managing their software development processes.*

*If you look for a software partner, very much knowledgeable of latest technologies I can strongly recommend ASSIST.*

**Rainer Scharpegge**
