Metal Techniks SRL is a medium privately owned company with 100% Romanian capital. It was established in 1991 in Ramnicu Valcea, Romania.

With a total area of 10500m<sup>2</sup> from which 5000m<sup>2</sup> covered area, MTK manufactures a diversified range of steel structures and mechanical-welded assemblies.

Our main activity is the manufacturing of mechanical welded structures for different applications, elements of Pipe lines and pipe supports, Machining, Transport and special services related to transports, etc.

The welding is done according to Approved Procedures and welders are certified in accordance with European or American standards. MTK is certified according to EN ISO 3834-2.

The machined parts are cut into desired shape by operations like turning, drilling and milling, The machining programs are initially designed by an engineer using advanced software.

More than 80% of our products have been exported.

## **Products & Services**

1. Welded and machined structures for the Aeronautic and Automotive fields
  - Welded structures for different devices used in aircraft assembly
  - Structures for different ground services in airports: baggage tractors, elevators for aircraft loading, other special applications
2. Water and Oil and Gas applications:
  - Non-pressurized tanks for oil and water storage
  - Non-pressurized vessels and simple pressure vessels
  - Pipe line elements such as flanges and manufactured pipes
  - Rectangular tanks
  - Hydraulic containers
  - Welded structures for Waste Water Treatment plants
  - Oil-Water separators
3. Engines
  - Welded frames of engines and generators
  - Machined parts for engines and generators
4. Welded constructions
  - Welded structures in accordance with EN 1090-2:2008+A1:2011 and Regulation 305:2011 of the European Parliament and of the Council
  - Welded structures such as ladders and platforms in accordance with EN ISO 14122-1/2/3/4/5 ,
  - Special mobile working platforms
  - Different other structures in accordance with EUROCODE 3, such as office modules
  - Different lifting attachments in accordance with EN 13155:2003+A2:2009 and the Machinery Directive's requirements
5. Machined Parts with different applications:
  - Machined parts for Automotive applications
  - Flanges and cylinders
  - Hydraulic cylinders
  - Gear boxes

- Large range of assemblies with Industrial applications
- 6. Transport and Logistics
  - Racks for transport and logistics
  - Special containers according to client's requirement
  - Special supports and devices

Metal Techniks has and maintains the quality system according to ISO 9001:2015.

In June 2013, MTK was certified according to EN 1090-1:2008/A1:2011 for the manufacturing of structures in class EXC2/ EN 1090-2.

We manufacture the products according to drawings provided by the customers or in accordance with our design.

More than 90% of our products have been exported in different European countries.

Some pictures with our products are available on the web address: [www.metaltechniks.ro](http://www.metaltechniks.ro)
