

Cleaning by disinfection

We offer disinfectant cleaning, which reduces the risk of transmission of viral and bacterial diseases with an effect lasting of up to 21 days.

Disinfection of solid surfaces

includes wiping surfaces such as handles, hand-grips and railings

Disinfection by dew-drop spraying of space

includes even spraying by Sanit All Air

Description of detergents:

Disinfectant: odourless, alcohol-free, chlorine-free

Does not damage any materials: glass, wood, metals, plastic, paper, textiles, rubber.

It is non-corrosive, has a strong and long-lasting antibacterial, antiviral and anti-fungal effect.

It forms a protective polymer layer on the surface, which has bactericidal (G+ and G- bacteria), virucidal (including Poliovirus, Adenovirus, BVDV, Vaccinia Virus), tuberculocidal, mycobactericidal (M.terrae, M.avium), fungicidal and algicidal effects.

We provide the application with the help of powerful electric or motor sprayers.
